Name: Usman Zaheer (1148583)

Date: April 11, 2021

Course: CIS 1050 (Web Design & Development)

In the collection of my three pages I have over 30 images all from separate websites so it would

be impossible to cite them individually. To put it simply whatever I was talking about in the

page, whether it is Namba or the Monkey Park I simply Google image searched for the image of

each of the according places and saved them into a folder. I hope this isn't a problem!
